		Correction:	Brown-Forsythe test, 115, 116-118, 234
Chapter 13, throughout		Due to a programming error in the final typesetting/printer interface, many of the boldfaced Greek characters, including alpha, beta, sigma, and gamma were reduced several point sizes, making them difficult to distinguish from subscripts. Because of this error, we are reprinting the text to correct it, and no further copies from the first printing will be distributed. For your convenience, we have included a corrected chapter (PDF file) on this website which you may download and print.
